# 2024RTK/2324RTK TRACK TRENCHER

## DESIGN

The RTK Stand-on Track Trencher features a fixed platform, and with engine options of 20 or 23hp, it attacks the ground and the job with the power to meet the challenge. Trenching up to 48" deep and 6" wide, this trencher will take on anything that is thrown at it. The RTK trencher features a 7.1" wide track that creates 235 square inches of footprint on each side of the machine. This gives outstanding traction on wet soil, clay, sand, or steep terrain while softening the impact on any existing landscaping. The track absorbs most of the impact caused by rocks, roots, or other obstructions in the soil. The RTK features a weight advantage that improves traction, reduces impact on the operator, and provides stability. All models feature electric start. Refilling trenches is simple with the optional backfill blade attachment

Hydraulic pumps are protected yet accessible

Simple one-handed controls are easy for any operator

## CONTROLS

The RTK features a unique fine-tuning control adjustment that uses rod linkage instead of cables. The Adjustable Trenching Control (ATC) can be positioned to modify the trenching speed of the tracks individually while on the go. By utilizing the individual track controls, the operator has the ability to keep their trench straight when working on uneven terrain.

## RTK BACKFILL BLADE

Optional backfill blade attachment

24", 30", 36", 42" or 48" digging depth  
4" or 6" digging width
